

GLYSTRO REMOTE CONTROLLED CURTAIN TRACKING

AN AUTOMATED CURTAIN SYSTEM BY **SOMFY AND KINGTRACK**

GLYSTRO : Characteristics: *Slim and compact motor combined with a simple track. Large Size roller runners provide excellent and smooth capability and quietness. Weight carrying capacity 50kgs on a 2 way track up to 12 metres. Built-in sensor for automatically setting its own limits. A Powerful yet Quiet 24v DC motor. Built-in Radio receiver compatible with Somfy's radio switches and hand-held transmitters.*

New Belt-Driven System:

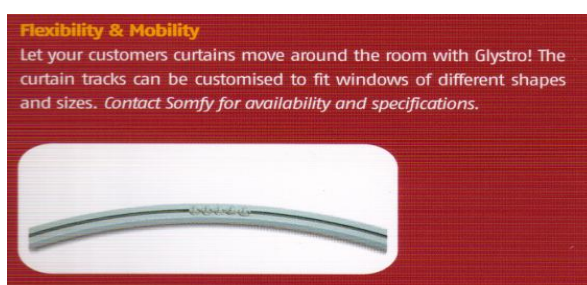

The new belt-driven system has a steel core embedded in the belt which eliminates tension at the initial setting and during use. Unlike other polyester cord driven tracks, the glystro belt does not slacken or elongate during operation

Heavy Duty Roller Runners

***BENDING AVAILABLE
PRICE ON APPLICATION***

Track over 6.00 metres will require joining.

Available in White only
